

AI Readiness & Maturity Jump Starts

Start smart. Align fast. Execute with confidence.

Three entry points designed to meet organizations at different stages of AI maturity — from readiness assessment to enterprise-scale execution.

How the Jump Starts Work Together

Diagnostic → Accelerator → Managed Service

Assess readiness and risk → Align leaders and commit to action → Execute, govern, and realize measurable value

This progression allows organizations to start small, reduce risk, and scale AI responsibly as confidence and capability grow.

	Diagnostic: AI Readiness	Accelerator: AI Enablement Workshop + Leadership Alignment	Managed Service: AI Execution Platform + Advisory
Value	Know where you stand — and where to start — before you invest	Turn AI ambition into shared priorities and near-term action	Turn AI strategy into sustained, measurable outcomes
What It Is	A fast, decision-grade assessment of organizational AI readiness and risk	A readiness assessment plus a high-impact leadership alignment workshop	An ongoing managed service to operationalize AI and govern execution
Primary Outcome	Clarity and confidence for executive decision-making	Alignment, ownership, and momentum	Scalable execution, governance, and value realization
Choose This If...	You need an objective, credible view of AI readiness before committing time or capital	You want leadership alignment and action without a long-term program commitment	You are ready to execute AI initiatives and need discipline, visibility, and accountability
Best For	Executives and boards seeking clarity and risk awareness	Leadership teams ready to move from analysis to action	Organizations serious about scaling AI responsibly across the enterprise
AI Readiness Assessment	Comprehensive assessment across strategy, governance, operating model, and data/process maturity	Same comprehensive assessment as Diagnostic	Builds on prior work; focused on execution maturity and outcomes
Risk & Controls	Identifies where AI efforts may stall, fail, or create exposure	Early identification of delivery, governance, and adoption risks	Continuous risk sensing across delivery, compliance, adoption, and change
AI Roadmap	Prioritized roadmap (3–5 initiatives) with clear success measures	Outcome-based roadmap aligned to strategic objectives	Roadmap translated into executable AI OKRs and initiatives

Leadership Alignment	Executive readout and decision package	Facilitated alignment on priorities, ownership, and sequencing	Ongoing leadership enablement and coaching
Workshops	—	1–2 day facilitated workshop (onsite or virtual)	Alignment & kickoff workshop plus ongoing execution cadence
Governance & Cadence	—	—	Monthly and quarterly value reviews to guide decisions and course-correct
Execution Tracking	—	—	In-platform tracking of progress, outcomes, dependencies, and decisions
Platform Access	AgilityInsights Platform (quarterly subscription)	AgilityInsights Platform (quarterly subscription)	AgilityInsights Platform (annual subscription)
Key Deliverables	Decision-grade insights, risk view, prioritized roadmap, executive-ready package	All Diagnostic deliverables plus aligned leadership commitments	OKRs, execution tracking, governance insights, and sustained value delivery
What Makes It Different	Built for executive decisions — not experimentation	Strategy, risk, and alignment combined in one engagement	Designed for value realization, not activity tracking
Typical Engagement	Short, focused engagement	Short, intensive engagement	Ongoing managed service
Investment	~\$12,000	~\$25,000	~\$75,000
